## Qualifications

---

- 3 years of experience as a **Full-Stack Developer** with expertise in both frontend and backend technologies.
  - Proficient in frontend technologies including **JavaScript**, **React**, **Vue.js**, and **Material-UI (MUI)**.
  - Strong backend skills with experience using **Node.js**, **Express**, **PostgreSQL**, and **MongoDB**.
  - Passionate about building efficient and scalable web applications and contributing to open source projects (OSS).
  - Experience in setting up and managing **CI/CD pipelines** and **version control systems** for streamlined development workflows. **Technical Skills**
- 

- **Languages & Frameworks:** HTML, CSS, Tailwind CSS, Material UI, JavaScript, React, Node.js, Express, REST APIs, Axios, PostgreSQL, MongoDB, Mongoose, Redis, Redux, Redux Toolkit, C, C++, Scrum and Agile Development
- **Software:** Version control (GitHub, Gitlab), Figma, Balsamic, Canva, VS Code, ChatGPT, Cursor AI, Claude Sonnet, Replit, Docker, Linux, Postman.

## Experience

---

### Flash Health Technologies

Vancouver, BC

#### Full-stack Developer

May 2025 – June 2025

- **Diagnose** performance bottlenecks and implement solutions to optimize web application performance.
- **Regularly** review and enhance existing application code to meet quality and performance standards.
- **Develop**, maintain, and enhance web applications using JavaScript, TypeScript, Next.js, Auth.js (2FA), Node.js, ReTool, and other modern technologies.
- **Create** and refine secure, efficient API routes and functionalities in Node.js.
- **Work** extensively with Next.js, particularly App routers, ensuring smooth user experiences.
- **Engage** in detailed database modeling and management using MySQL and NoSQL MongoDB.

### BlueWave Labs

Toronto, ON (Remote)

#### Full-stack Developer

Apr 2024 – April 2025

- **Developed** reusable and scalable React components to enhance user experience and maintainability.
- **Contributed** as one of the top 3 developers on the open-source project, helping scale it to achieve over 4600 stars on GitHub.
- **Utilized** React props for efficient data flow and dynamic component behavior.

# Monzer Mourad

---

- **Conducted** code reviews to improve code quality, maintainability, and adherence to best practices.
- **Engineered** a robust backend using the MERN stack, incorporating controllers, middleware, routes, services, modules, validation, and Dockerized environments for scalability.

**Baytree Center**

**London, England (Remote)**

**Full stack Developer**

**Sept 2022 – May 2023**

- **Developed** and maintained full-stack applications using TypeScript for the frontend and Django/Python for the backend.
- **Built** and optimized scalable backend APIs and interactive user interfaces to enhance application performance.

**Etro**

**Burnaby, BC**

**Innovation and Technology Coordinator**

**Sept 2021 – Feb 2022**

- **Designed** and implemented internal web forms to streamline company workflows and data collection processes.

**Punch Tools**

**Burnaby, BC**

**Frontend Developer**

**May 2021 – Aug 2021**

- **Built** and maintained the company website using HTML, CSS, and JavaScript, ensuring a responsive and user-friendly experience.

## Education

---

**Bachelor of Science in Computer Science (BSc CS)**

**2019 - 2023**

Simon Fraser University

**Computer Science and Software Systems Certificate**

**2018- 2019**

Vancouver Community College
